INTERNATIONAL CONFERENCE
“Protecting water resources with nature-based solutions”
“PS4S-2023”

Dates: 24,25,26 May 2023
Venue: to be announced, Drama, GREECE

“Protect-Streams-4-Sea”
“Protecting streams for a clean Black Sea by reducing sediment and litter pollution with joint innovative monitoring and control tools and nature-based practices” (BSB963)

Scientists from all over the world are welcome to present their latest research that is focused on water resources management and tools for practicing sustainable management of ecosystems. The conference is free of charge and will be held in Drama, Greece. The deadline for extended abstract submission is 14 April 2023 via email to protectstreams4sea@gmail.com

Please check the Template for the extended abstracts.

TOPICS:

- Integrated water resources management
- Policies and governance related to water resources management
- Hydrologic modelling
- Remote sensing, airborne and GIS applications
- Groundwater and hydrological response under climate alterations
- Ecotourism, water resources and community well-being
- Water resources and sustainable ecosystems as relates to conservation, biodiversity and production
- Nature-based solutions and environmental protection
- Tools to assess environmental impacts and climate change effects (footprints, nexus approach, impact and risk assessment, life cycle assessment, etc.)
- Sustainable management of agricultural water and land resources
- The urban water cycle and wetland parks
- Protected areas and geoparks
- Water quality and advanced technologies to facilitate industrial and municipal wastewater reuse
- Natural disasters - mitigation approaches in a changing climate (erosion, landslides, floods, etc.)

Selected manuscripts will be submitted to journals!
